Android Studio is a complete software specially made for Android developers who need to create

applications, debug, test and emulated directly on the computer.. We know how important is this mobile operating system and how many applications are in the store. It's pretty simple for developers to publish their apps there.

Android Studio 3.4 Free Download for Windows 10, 8 and 7 ...

In every instance in all of my classes where I reference R.id.something, the R is in red and it says "cannot resolve symbol R". Also every time there is R.layout.something it is underlined in red and says "cannot resolve method setContentView(?)". The project always builds fine. It is annoying to see this all the time.

"cannot resolve symbol R" in Android Studio - Stack Overflow
