### **- PHP, Apache, MySQL, Windows : WampServer**

Setting up PHP Installation. The installation of PHP is bit odd since instead of using a single installation package you need the ZIP package and the installer package, since the installer doesn't contain the full PHP package (but it's useful for creating a working php.ini file easily). Also, the part of the PHP installer for configuring Apache hasn't been finished yet for versions 4.x, so we ...
