Atkins And Depaula Physical Chemistry

kT (also written as $k_B T$) is the product of the Boltzmann constant, k (or k_B), and the temperature, T . This product is used in physics as a scale factor for energy values in molecular-scale systems (sometimes it is used as a unit of energy), as the rates and frequencies of many processes and phenomena depend not on their energy alone, but on the ratio of that energy and kT , that is, on E / kT ...

E) The Heads of schools must ensure that the Subject/Reference Books procured on the recommendations of the School Library Purchase Committee (as indicated above in Table - 7) fulfil the following criteria: -

GOVT. OF NCT OF DELHI OLD SECRETARIAT, DELHI - 110054 NO ...

An activity coefficient is a factor used in thermodynamics to account for deviations from ideal behaviour in a mixture of chemical substances. In an ideal mixture, the microscopic interactions between each pair of chemical species are the same (or macroscopically equivalent, the enthalpy change of solution and volume variation in mixing is zero) and, as a result, properties of the mixtures can ...
