Short Course 3rd Third Edition*

### **By James D Watson Recombinant**

Early life and education. James D. Watson was born in Chicago on April 6, 1928, as the only son of Jean (Mitchell) and James D. Watson, a businessman descended mostly from colonial English immigrants to America. His mother's father, Lauchlin Mitchell, a tailor, was from Glasgow, Scotland, and her mother, Lizzie Gleason, was the child of parents from County Tipperary.

TED Talk Subtitles and Transcript: Nobel laureate James Watson opens TED2005 with the frank and funny story of how he and his research partner, Francis Crick, discovered the structure of DNA.

### **James Watson: How we discovered DNA | TED Talk Subtitles ...**

DNA: DNA, organic chemical of complex molecular structure found in all prokaryotic and eukaryotic cells. It codes genetic information for the transmission of inherited traits. The structure of DNA was described in 1953, leading to further understanding of DNA replication and hereditary control of cellular activities.

### **DNA | Discovery, Function, Facts, & Structure | Britannica.com**

DNA is a long polymer made from repeating units called nucleotides. The structure of DNA is dynamic along its length, being capable of coiling into tight loops and other shapes. In all species it is composed of two helical chains, bound to each other by hydrogen bonds. Both chains are coiled around the same axis, and have the same pitch of 34 angstroms (Å) (3.4 nanometres).

With breakthroughs in gene manipulation and cell culture, several tools in medical biotechnology were invented since 2000, including stem cell therapy and tissue engineering ( ). Stem cell therapy is rapidly being translated to the clinic, with nearly 1000 clinical trials (clinicaltrials.gov) and several approved stem cell-based products being sold in some countries.

Vaccines often contain preservatives, adjuvants, additives, or manufacturing residuals in addition to pathogen-specific immunogens. Some parents, alerted by stories in the news media or information contained on the World Wide Web, are concerned that some of the substances contained in vaccines might harm their children. We reviewed data on thimerosal, aluminum, gelatin, human serum albumin ...

El ácido desoxirribonucleico, abreviado como ADN, siempre es un ácido nucleico que contiene las instrucciones genéticas usadas en el desarrollo y funcionamiento de todos los organismos vivos y

algunos virus; también es responsable de la transmisión hereditaria. La función principal de la molécula de ADN es el almacenamiento a largo plazo de información para construir otros componentes ...

Frederick Sanger: Frederick Sanger, English biochemist who was twice the recipient of the Nobel Prize for Chemistry. He was first awarded the prize in 1958 for his determination of the structure of the insulin molecule, and in 1980 he shared the prize for his determination of base sequences in nucleic acids.
