Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

1. The nurse is caring for a patient who states, No one can understand God. The nurse would document the patient's spiritual belief as which of the following? Overview. The epididymis is a long, tightly coiled tube located behind each testicle that connects the testicle to the ductus deferens and stores sperm.. Acute epididymitis is inflammation of the epididymis, causing pain and swelling of the scrotum. Most cases are caused by sexually transmitted bacterial infections occurring in men age 19 to 35 years old.
