Clinical Microbiology And Infectious Diseases

The Division of Microbiology and Infectious Diseases (DMID) supports extramural research to control and prevent diseases caused by virtually all human infectious agents except HIV. DMID provides funding opportunities and a comprehensive set of resources for researchers that support basic research, preclinical development, and clinical evaluation.

Since 2001, numerous descriptive ecological studies of *Clostridioides difficile* infections (CDI) have identified a single lineage (BI/NAP1/027) associated with the epidemics of CDI, increased severity of CDI, and increased likelihood of incident CDI to become recurrent. Establishing causality between the clinical severity and outcomes for CDI and the lineages of the...
