Define Math Term Mean

Definition of. more ... The mean is the average of the numbers: a calculated "central" value of a set of numbers. To calculate it: add up all the numbers, then divide by how many numbers there are.

Mean Definition (Illustrated Mathematics Dictionary)

In Algebra a term is either a single number or variable, or numbers and variables multiplied together. Terms are separated by + or – signs.

Term Definition (Illustrated Mathematics Dictionary)

Mean - The mean is the same as the average. Add up the series of numbers and divide the sum by the number of values. Median - The Median is the 'middle value' in your list or series of numbers. When the totals of the list are odd, the median is the middle entry in the list after sorting the list into increasing order.
