

Desktop Publishing And Design For Dummies

Desktop Publishing And Design For

Desktop publishing (DTP) is the creation of documents using page layout software on a personal ("desktop") computer. It was first used almost exclusively for print publications, but now it also assists in the creation of various forms of online content. Desktop publishing software can generate layouts and produce typographic-quality text and images comparable to traditional typography and printing.

Desktop publishing - Wikipedia

The history and future of desktop publishing and electronic publishing. A primer of the history of DTP hardware and software as it has affected professional graphic designers, printers and pre-press professionals.

History of desktop publishing (DTP), future of design

Desktop publishing is the process of using the computer and specific types of software to combine text and graphics to produce documents such as newsletters, brochures, books, and web pages.; Graphic design uses text and graphics to communicate an effective message in the design of logos, graphics, brochures, newsletters, posters, signs, and other types of visual communication.
