Note to reader: infoDev – a program of the World Bank – promotes innovation and entrepreneurship in smart agriculture, digital technology, and climate change technology. Through business programs and early stage financing, we help developing countries in the Caribbean, Africa, and Asia go green and develop solutions to local problems. In the past, infoDev worked with ICT and education.

Impact of ICTs on Learning & Achievement | infoDev

Introduction. The use of digital technologies and social networking has grown rapidly over the last decades, and these technologies are increasingly being incorporated into the teaching of higher education (Garrison, 2011, Garrison and Anderson, 2003, Laurillard, 2005). As a result, both nurse educators (Bristol, 2005, Mancuso, 2009, Nguyen et al., 2011) and preregistration nursing students ...

Information and communication technology (ICT) can complement, enrich and transform education for the better. As the lead United Nations Organization for education, UNESCO guides international efforts to help countries understand the role such technology can play to accelerate progress toward Sustainable Development Goal 4 (SDG4), a vision captured in the Qingdao Declaration.

There Are No Technology Shortcuts to Good Education. Kentaro Toyama. There are no technology shortcuts to good education. For primary and secondary schools that are underperforming or limited in resources, efforts to improve education should focus almost exclusively on better teachers and stronger administrations.

There Are No Technology Shortcuts to Good Education ...

The term “personal injury claim” has become somewhat mainstream, especially in recent times. You’ve probably seen or heard the adverts on the television, the radio, the Internet and other advertising mediums, asking whether you have been injured in an accident and therefore require the services of a personal injury solicitor/ lawyer, but what exactly is a personal injury claim?

Claims Information | Blog exploring claims through accidents.

Investing heavily in school computers and classroom technology does not improve pupils' performance, according to a global study from the OECD.

Computers 'do not improve' pupil results, says OECD

Since the adoption of the 2030 Agenda for Sustainable Development in 2015, countries have continuously updated institutional arrangements in order to enable government institutions and other stakeholders to implement the Agenda.

3 Reasons Why Sloppy Thinking Leads to Careless Educational ICT. Larry Cuban. If ICT means the use of computers in schools and classrooms and if learning means what academic content, skills, and behaviors students can perform in and out of school, then the massive investment over the past 30 years in wiring schools, buying computers and the latest hand-held device has fallen far short of being ...
