Drop Out Papers

Why Students Drop Out. Even though school completion rates have continually grown during much of past 100 years, dropping out of school persists as a problem that interferes with educational system efficiency and the most straightforward and satisfying route to individual educational goals for young people.

Note: This essay was originally published in 1928 (long before computer networks were invented :-)) and discussed size in the natural (biological) world and systems. As you read it, think about whether there is a "right size" for a network (or a piece of a network such as an Autonomous System), and what aspects of a network determine the "right size."

The oil drop experiment was performed by Robert A. Millikan and Harvey Fletcher in 1909 to

measure the elementary electric charge (the charge of the electron).. The experiment entailed observing tiny electrically charged droplets of oil located between two parallel metal surfaces, forming the plates of a capacitor. The plates were oriented horizontally, with one plate above the other.
