### **How To Use Guide Layer**

Flash CS3 For Dummies. To create a guide layer, create a new layer. Then right-click (Windows) or Control+click (Mac) and choose Guide in the shortcut menu. The layer is now a guide layer. Use the same procedure to convert a guide layer back to a regular layer. The Guide item on the menu is a toggle, so when you click it again,...

### **Creating and Using Guide Layers in Flash CS3 - dummies**

Layers are different images stacked on top of each other. You can use each layer without affecting another one to make adjustments. Together they form one final image. It could look something like this in real life. The advantage of using Layers is that you can save a Photoshop file with all the layers included.
