Water Classes are determined by how much water is present and the type of material that is absorbing the water. In simplified terms, water classes are arranged by the difficulty and time needed to dry out an area. For formal definitions, see IICRC S500 Standard and Reference Guide for Professional Water Damage Restoration. Class 1.

**IICRC Water Classification - Water and Fire Damage Restoration**

The IICRC organization went to great lengths to improve the previous guidelines by partnering with various organizations including, but not limited to, the scientific community, restoration training school and global trade associations. This is the first set of primary revisions made to the guidelines since the 2006 edition.

**Newly Revised IICRC S500 in 2015: What You Need to Know**

It is hoped that these guidelines will serve that purpose. This Reference Guide is a standard textbook in the IICRC-approved Senior Carpet Inspector courses, and practicing IICRC inspectors have agreed to adhere to these guidelines to the extent possible in each case.

**Historical Standards | IICRC Standards Subscriptions**

The IICRC first published the Standard and Reference Guide for Professional Carpet Cleaning (S001) in 1991 and revised it as the S100 in 1994, 1997, 2002 and 2011. The Sixth Edition of the IICRC S100 (2015) contains additional updates and revisions. IICRC S300 - Professional Upholstery Cleaning - First Edition: 2000
