## **Introduction to Machine Learning - Alex Smola**

Course description: This course will cover fundamental topics in Machine Learning and Data Science, including powerful algorithms with provable guarantees for making sense of and generalizing from large amounts of data. The course will start by providing a basic arsenal of useful statistical and computational tools, including generalization guarantees, core algorithmic methods, and fundamental ...

Has this happened to you? You are working on your dataset. You create a classification model and get 90% accuracy immediately. "Fantastic" you think. You dive a little deeper and discover that 90% of the data belongs to one class. Damn! This is an example of an imbalanced dataset and the ...

This is Umut Acar's research web page at the Carnegie Mellon University Computer Science Department (CMU, CSD, SCS) in Pittsburgh, PA, USA. It contains information about my ongoing research, research group, and our research activities. The page contains links to our papers (publications) as well as to our collaborators, and co-authors.

This project contains an overview of recent trends in deep learning based natural language processing (NLP). It covers the theoretical descriptions and implementation details behind deep learning models, such as recurrent neural networks (RNNs), convolutional neural networks (CNNs), and reinforcement learning, used to solve various NLP tasks and applications.
