

Mastering Angularjs For Net Developers

Mastering Angularjs For Net Developers

There is no doubt that AngularJS - the self-proclaimed "superheroic JavaScript framework" - is gaining traction. I'll refer to it frequently as just "Angular" in this post. I've had the privilege on working on an enterprise web application with a large team (almost 10 developers, soon growing to over 20) using Angular for over half...

10 Reasons Web Developers Should Learn AngularJS - Wintellect

AngularJS is a JavaScript-based open-source front-end web framework mainly maintained by Google and by a community of individuals and corporations to address many of the challenges encountered in developing single-page applications. It aims to simplify both the development and the testing of such applications by providing a framework for client-side model-view-controller (MVC) and model ...

AngularJS - Wikipedia

Without suitable tools and extensions, the thing just would not fly. And indeed, there are quite a number of them. Modern IDEs do their best to compensate for the language weaknesses, providing IntelliSense hints, checking the code correctness in the editor, allowing for refactoring, suggesting (and sometimes enforcing) good programming habits.

AngularJS advantages and limitations | SoftElegance's Blog

Explore techniques and tools outside of Angular that can enhance your app development workflow. Learn how to work with tools for building and deploying Angular apps into production, frameworks and libraries that can help speed up development, and more.

The article will give you glimpse over creating Web API projects and how to use POSTMAN for testing your web APIs. For this article, I will consider the same project I created in Content Negotiation and Postman for testing. The mechanism to map the service request and its input data to the correct action method and its parameters is known as Model Binding aka Parameter Binding.

Understanding Model Binding in ASP.NET Web API

#Golang #interoperability #microservices #containers #cloud---Target audience: Developers, Senior developers, Project leads, Architects, CTOs, and technical decision makers that want to learn Golang fast and deep enough to fully understand in which projects and areas it will be a wise decision to use Golang.
