Autoethnography is a form of qualitative research in which an author uses self-reflection and writing to explore anecdotal and personal experience and connect this autobiographical story to wider cultural, political, and social meanings and understandings. Autoethnography is a self-reflective form of writing used across various disciplines such as communication studies, performance studies ...

Autoethnography - Wikipedia

Nurses use research to answer questions about their practice, solve problems, improve the quality of patient care, generate new research questions, and shape health policy. Nurses who confront questions about practice and policy need strong, high-quality, evidence-based research. Research articles in peer-reviewed journals typically undergo a rigorous review process to ensure scholarly ...

Reading and critiquing a research article - American Nurse ...

Grounded theory (GT) is a systematic methodology in the social sciences involving the construction of theories through methodical gathering and analysis of data. Grounded theory is a research methodology which operates inductively, in contrast to the hypothetico-deductive approach. A study using grounded theory is likely to begin with a question, or even just with the collection of qualitative ...

Grounded theory - Wikipedia

Carers play a vital role in supporting family members who are sick, infirm or disabled. 1 There is no

doubt that the families of those with mental disorders are affected by the condition of their near ones. Families not only provide practical help and personal care but also give emotional support to their relative with a mental disorder.
