

Single Page Web Applications Michael S Mikowski

Single Page Web Applications Michael

History. The origins of the term single-page application are unclear, though the concept was discussed at least as early as 2003. Stuart (stunix) Morris wrote the Self-Contained website at slashdotslash.com with the same goals and functions in April 2002 and later the same year, Lucas Birdeau, Kevin Hakman, Michael Peachey and Evan Yeh described a single page application implementation in the ...

Please note: This is a collaboration piece between Michael Herman, from Real Python, and Sean Vieira, a Python developer from De Deo Designs. After reviewing the available tutorials out there I thought, "there must be a better way" - then I saw Miguel Grinberg's mega-tutorial. The focus that ...

Python Web Applications with Flask - Part I - Real Python

A mashup (computer industry jargon), in web development, is a web page or web application that uses content from more than one source to create a single new service displayed in a single graphical interface. For example, a user could combine the addresses and photographs of their library branches with a Google map to create a map mashup. The term implies easy, fast integration, frequently ...
