

Structure And Interpretation Of Computer Programs 2nd Edition

Structure And Interpretation Of Computer

Every computer program is a model, hatched in the mind, of a real or mental process. These processes, arising from human experience and thought, are huge in number, intricate in detail, and at any time only partially understood. They are modeled to our permanent satisfaction rarely by our computer programs.

Structure and Interpretation of Computer Programs, 2nd ed.

It offers an online version of the textbook for the course, Structure and Interpretation of Computer Programs, 2nd ed., by Abelson, Sussman, and Sussman. Course Description. This course introduces students to the principles of computation.

Structure and Interpretation of Computer Programs ...

CS 61A: Structure and Interpretation of Computer Programs. Lab this week will be on Macros and will run in a discussion-style. We highly encourage attendance as Macros will not be covered in discussion; See @2865 for more details; Scheme project

CS 61A: Structure and Interpretation of Computer Programs

Structure and Interpretation of Computer Programs. Structure and Interpretation of Computer Programs (SICP) is a textbook aiming to teach the principles of computer programming, such as abstraction in programming, metalinguistic abstraction, recursion, interpreters, and modular programming.
