Suzuki Dt6 Outboard Motor Service

I'm reviewing a 2001 DT6. This motor weighs a little over 60lbs. and has amazing torque. I used to run a 5hp merc single cylinder that didnt compare to the torque of this twin cylinder suzuki. On a recent hunting trip the motor used 5 gallons of gas for 62 miles of boating to include hauling a moose on the return trip.

hello, heres one for the experts again: Ive just bought a very nice little Suzuki DT6, it was first sold in 1998 and has maybe 5 hours on it since then- looks and runs like new. In the manual Ive seen that the smaller Suzukis (DT5, DT6 and DT8) are all mechanically similar, so Id like to know what I would have to do to beef my 6hp up to the 8hp version?
