Connecting ADHD and Nutrition. ADHD and its cousin, attention deficit disorder (ADD), are the most widely diagnosed neuropsychiatric diseases of childhood. The Centers for Disease Control and Prevention says that 11 percent of children from age 4 to 17 have been diagnosed with ADHD — boys at more than double the rate of girls.

Connecting ADHD and Nutrition - Experience Life

About autism. Many have severely disrupted digestion, so restoring balance in the gut is a key focus for nutritional therapy. Also important is balancing blood sugar, checking for brain-polluting heavy metals, excluding food additives, identifying food allergies and possible nutrient deficiencies, and ensuring an optimal intake of essential fats.
