In mathematics, a proof is an inferential argument for a mathematical statement. In the argument, other previously established statements, such as theorems, can be used. In principle, a proof can be traced back to self-evident or assumed statements, known as axioms, along with accepted rules of inference. Axioms may be treated as conditions that must be met before the statement applies.

Lumariver Profile Designer is a software that makes profiles for your camera (or scanner), either in DNG Camera Profile (DCP) or ICC format, thus supporting almost all raw converters on the market. Like any profile maker it can be used for reproduction like copying artwork, but it's also specifically designed to make general-purpose profiles which provide both accurate and attractive colors.

The value of Yogananda's Autobiography is greatly enhanced by the fact that it is one of the few books in English about the wise men of India which has been written, not by a journalist or foreigner, but by one of their own race and training—in short, a book about yogis by a yogi. As an eyewitness recountal of the extraordinary lives and powers of modern Hindu saints, the book has ...

No matter how many times one introduces visual novels to a Western audience, the initial response will largely be the same: Porn. Now naturally, the genre has been largely dominated with adult content since it came to fruition, and to this very day, 80 percent of adult material produced in Japan is in the form of manga and visual novels, which is a quite staggering number considering how large ...

The Company Line. Far from ignoring shaft weight, some of the big OEMs have actually built ad campaigns around it. The problem? They've tried to brain wash you into thinking that picking the right weight is simple: "Pick a lighter shaft and you'll hit it farther," they claim, "and stronger players should play heavier shafts." Now if you've been paying any attention to our Labs ...
