Social psychology examines how people affect one another, and it looks at the power of the situation. Social psychologists assert that an individual's thoughts, feelings, and behaviors are very much influenced by social situations. Essentially, people will change their behavior to align with the social situation at hand.

### **Social Psychology and Influences on Behavior ...**

Behavioral psychology has some strengths. Behaviorism is based on observable behaviors, so it is sometimes easier to quantify and collect data when conducting research. Effective therapeutic techniques such as intensive behavioral intervention, behavior analysis, token economies, and discrete trial training are all rooted in behaviorism.

### **History and Key Concepts of Behavioral Psychology**

The biopsychology of our perception of time is a fascinating but little understood area of psychology and neuroscience. It looks at the way our brain processes time and time intervals, and the brain's built-in expectation of the order and speed of events, as well as the field of mental chronometry.
