

Version Of A Worksheet Shows The Results Of Formulas

Version Of A Worksheet Shows

Type n is the Number type. This includes all forms of data that Excel stores as numbers, such as dates/times and Boolean fields. Excel exclusively uses data that can be fit in an IEEE754 floating point number, just like JS Number, so the v field holds the raw number. The w field holds formatted text. Dates are stored as numbers by default and converted with XLSX.SSF.parse_date_code.

Format. The accounting worksheet is essentially a spreadsheet that tracks each step of the accounting cycle. The spreadsheet typically has five sets of columns that start with the unadjusted trial balance accounts and end with the financial statements. In other words, an accounting worksheet is basically a spreadsheet that shows all of the major steps in the accounting cycle side by side.
